I saw you on the corner from the corner of my eye And you were looking at me as I was passing by We didn't know each other and we didn't really care Only one thing mattered so we stopped and stood and stared.

I knew that you could see me and you knew that I saw you And yet we still pretended that it wasn't true Everything went hazy and the world was standing still How could I get the courage to go in for the kill.

Talk to me - I've been waiting much too long
Talk to me - And time is running on
Walk to me - It's not so far to go
Talk to me - Just come and say hello.

Everybody's watching and everybody knows
We've got to make a move now before the moment goes
No time for hesitation
it's something that can't wait
We have to get together before it is too late.

Talk to me - I've been waiting much too long
Talk to me - And time is running on
Walk to me - It's not so far to go
Talk to me - Just come and say hello.
