

So Devilish

The Underachievers

Dreamworkers paving the way since birth
Leading, awaking earth
Leaving these demons up under dirt
Crazy, Kemetic engravements
Truth tellin' while you niggas still stuck under the pavement
Still stuck on them slave ships
Better get to your optimus prime
Wasting time, it's stuck inside of your mind, that's a crime
But fuck that though, niggas ain't ready for the elevated soul
Radiant niggas, puff that good nigga, you know indo
Chakras line up so proper, spiritual monster, the pastor
Enlightened conscious, the holy father
So bow down when you see me
You ain't righteous cuz you sittin' round just puffin' on your treebe
You ain't never been alone inside the forest of the tipi
A eighth of shrooms, I'm talkin' bout some Lost shit, Fuck your TV
A rasta, no dreadlocks
A God, son no satan
A prophet, learn lessons
You prosper, live fearless
Cuz we never going die
Got these religious fucks, worshiping God crucified
Can't even see the truth hidden right in front they eyes
So these niggas live they life, just waitin' for they demise

May the truth be told
And not what these other rappers propose
They be froze when the action occurs, absent to blows
So when they say they sparkin', live conscious, run in apartments
I take these dude as serious as I take Martin Lawrence
Never harness deepened darkness, little bit of air, I breathe, I conquer
No fear, nigga that be what I sponsor, conscious fire, honest prosper
Bunch of liars on your roster, I am higher Haile Selassie
Prior to all the buyers, admired by all your posse
Idolize me, but Kamikaze if you copy
Word to my mom, I been ripping bongs since I was in her arm
Palm reader said our leaders in the mirror, no alarm

The most high, why lie, nigga I'm on my Jesus shit
As-salamu alaykum, my Gods, I'm on my people shit
Bowing down to satan, now yous a demon bitch
Send my blessings way up to jah, now I live limitless
Birth from the sun, you are all gods too
But I'm on a higher level, I am you times two
Got the knowledge from the light, now my mind shines food
But you live under the sun, so the world shines too

Grind through
Grow your wings and take flight, our times due
All elevated, reclaiming conscious to highest minds grew
Never lose, forever winning
Don't snooze, we up, committed
You fools live under limits
The sky was far until I lit it
Cannabis can attack your mans, it not for amateurs
Mind blazed, took five days to reap the damages
Cold world, so get lost quick, don't vanish son

Your mans will give your dirt and enemies will call the ambulance
So Devilish..
