## **Chain of Love**

## The Undertones

Every night when the light has gone I can see you carry on Knights in armour won't rescue you In the shadows - the naked truth

Chain of love - don't put me away Chain of love - don't put me away

Any time you took my name i had to change it back again Caught in crossfire never worried me I'm caught in chains deliberately

Chain of love - don't put me away ...

Take me away from this notion I'm nervous enough
Take me away from this girl
Who's a genius for love

She's a genius

Lonely nights like the night before See I've made you ask for more Tropical fever when the heat is on A pocket Venus the lonely one?

Chain of love - don't put me away ...
