Inoculate The Innocuous

The Unicorns

Small doses, daily
Absorbed and collected in the glands of fatty tissues over time

Somewhere in the asshole of my eye
There's a muscle which relaxes when you cry
Somewhere in the eye of my brain
There's a muscle which makes me go...

Storage cells for hidden substance But new flavours and aromas go on

Reflect on your absence Genuflect in my presence Remove your absess, they said it's cancer (flavourful, beautiful)

Bananas help me unwind Watermelon makes it awesome
