

I Wanna Be

The Union

Sometimes you know the words don't come too easy
Sometimes you feel alone and blind
You're walking in the dark
Somebody comes and gives you words of comfort from the heart
And you know that we've all had complications
Wrong roads where you feel you're lost and won't get very far
Somebody comes and gives you some direction and a start

And I wanna be the sound that rings in your ears
And I wanna be your candle in the dark
And I wanna be the hands that bring you back here

I wanna be the one you see
I wanna be the one you need

Your eyes have seen some things you don't believe in
Sometimes you feel disgust
No faith, should you just fade away
Somebody tells you hold your ground
Don't be afraid

I wanna see you, I wanna touch you
I wanna feel you, I wanna be there if you...
I wanna, I need you, I want you to know

I wanna be the one you see
I wanna be the one you need
