

Let It Flow

The Union

Open up a bag of 20/20 vision then I close my eyes
The animation of my senses helps me see your image in the sky

We can feel the pleasures of the grain
If you want to come in from the rain

Drifting through an open womb of colors that make me want to sleep
Awakening and to my surprise, you're lying next to me

We can hear the song the ocean sings
Holy water baptize me from sin

I'm letting go, let it flow, we can be high again
Just let it go, feel the flow, a journey that never ends

The invitation, to ride a shining star tonight
Take my hand and we can fly away
Celebration of this moment of this life
There will be a better way

The invitation, to ride a shining star tonight
Take my hand, and we can fly away
Celebration of this moment of this life there will be a better way
