

Room 5

The Unjust

The way you fooled the moon
The virus you exhumed
Open wide...

Even when you're all alone, Im your sun
Even when you're not here with me, Waht have I become
Even if you feel the same, when I'm around
Even if the truth is spoken, What have i become.

My hand begins the tune
The pain begins to bloom
Open wide...

Even when you're all alone I'm your sun
Even when you're not here with me, What have I become
Even now there, and even then you're scared
Now the times right, so realize its your time.

First time I seen you..
I couldnt face the moment,, face the moment

It's the way you fooled the sun
That feeling you've become
The taste of broken sores
Open wide...
