

# Silent Gun

The Veer Union

I reside the vacant sides as the sky turns gray  
Paralyzed in my disguise I will fade away

Now I hide away from me, I can not fight this disease

I fell into the cracks in my head that's where I lost it  
That's where my world went wrong cause the night I crossed  
It I couldn't stop there cause my mind was gone so my sadness  
Has turned to madness now know that I have become the silent gun

What I thought was right turned out the light deep inside of me  
Once was alive but can't revive what I use to be

Now I hide away from me, I can not fight this disease

I fell into the cracks in my head that's where I lost it  
That's where my world went wrong cause the night I crossed  
It I couldn't stop there cause my mind was gone so my sadness  
Has turned to madness now know that I have become the silent gun

I fell into the cracks in my head that's where I lost it  
That's where my world went wrong cause the night I crossed  
It I couldn't stop there cause my mind was gone so my sadness  
Has turned to madness now know that I have become the silent gun

Facing me, silent gun, facing me, silent gun
