

Gotta Move On

The Verve Pipe

Love is not strong, love is not stable
I tried to hold it but I wasn't able
I never thought that I'd be saying this to you
What else could I do?

Love leads to loss, words condescending
Love is the pathway to unhappy endings
And if I keep my chin up, I still see clouds that look like you
So look down is what I do

You know it's all right if you cry a little
Something inside you has died a little
You don't have to hide but you gotta move on
You gotta move on

Love leads to tears, tears lead to sadness
Sadness to memories, memories to madness
I never thought of all these things that love could be
Look what it did to me

You know it's all right if you cry a little
Something inside you has died a little
You don't have to hide but you gotta move on
You gotta move on

You know it's all right if you cry a little
Something inside you has died a little
You don't have to hide but you gotta move on

You know it's all right if you cry a little
Something inside you has died a little
You don't have to hide but you gotta move on
You gotta move on
