

Here In The Dark

The Verve Pipe

You, living in the light
Luminous and bright
You find me, with no one to impress
Feeling ominous

Light is a moment, dark is forever
And that's where I'll be

There's the daybreak off in the distance
Before you wake I will be gone
I'm disappearing into the shadows
Here in the dark where I belong

I, put the bottle to my face
Shot of whiskey as a chase
Look at you, bathing in the light
Living black and white

White is a moment, black is forever
And that's where I'll be

There's the daybreak off in the distance
Before you wake I will be gone
I'm disappearing into the shadows
Here in the dark where I belong

See the sun explode in the distance
Before you wake I will be gone
I'm disappearing into the shadows
Here in the dark where I belong

See the daybreak off in the distance
Before you wake I will be gone
I'm disappearing into the shadows
Here in the dark where I belong

See the sun explode in the distance
I will be gone
I'm disappearing back into the shadows
Here in the dark where I belong
