

Supergig

The Verve Pipe

Turn the cushions over, tonight we're coming over
Angry once, we're not so anymore
And all that we require is sweep the stage of fliers
It was funny once it's not so anymore

Me, I've got a supergig
Got a brand new rig
And I'll crank it for you all

The drummer's got a hard-on for every song he starts on
And once seemed loud, he's not so anymore
The catalog of ballads, we played to clean your palates
We used to care, we don't care anymore

Me, I've got a super sound
When I play around the gyms or parties
Me, I've got a super sound either way

There's not a missing link no matter what you think
There's not a missing link no matter what you think
There's not a missing link no matter what you think

And right before the break up
We turn around and make up
Once stupid, we are not so anymore

The fear of bargain basements
Are gone without a trace, yeah
We used to care, we don't care anymore

There ain't no way any super girl's
Gonna change my world or keep me down
'Cause me, I've got a super rig
Whether at a gig or playing in my room
