

First Love Never Dies

The Walker Brothers

All at once I miss you
So long since I've kissed you
How I love to look into your eyes

Yes I still dream about you
My world is lost without you
For you are my first love, and
First love never ever dies

Whenever I feel lonely
I'm thinking of you only
One last kiss and then we said goodbye

The love I left behind me
Comes back to remind me
That you were my first love, and
First love never ever dies

The love I left behind me
Comes back to remind me
That you were my first love, and
First love never ever dies

And if you're thinking of me
And you find that you still love me
There's no use to go on living lies

Let's hurry to each other
For there could be no other
Yes, you were my first love, and
First love never ever dies

First love never ever dies
