First Love Never Dies

The Walker Brothers

All at once I miss you So long since I've kissed you How I love to look into your eyes

Yes I still dream about you My world is lost without you For you are my first love, and First love never ever dies

Whenever I feel lonely I'm thinking of you only One last kiss and then we said goodbye

The love I left behind me Comes back to remind me That you were my first love, and First love never ever dies

The love I left behind me Comes back to remind me That you were my first love, and First love never ever dies

And if you're thinking of me And you find that you still love me There's no use to go on living lies

Let's hurry to each other For there could be no other Yes, you were my first love, and First love never ever dies

First love never ever dies
