

What's in It for Me

The Walkmen

What's in it for me I came here for a good time and you're telling me to leave
but you don't have to say it again, I heard you the first time

We're counting on you well I like to remember it like that
When we had one in the hand, that was one in the hand
but you never come over any more

So you don't have to say it again, I heard you the first time
