

What's in It for Me

The Walkmen

What's in it for me I came here for a good time and you're telling me to leave

but you don't have to say it again, I heard you the first time

We're counting on you well I like to remember it like that

When we had one in the hand, that was one in the hand

but you never come over any more

So you don't have to say it again, I heard you the first time
