The Beast Cures The Lover

The Wannadies

Here I am with luberon -my best friend My thoughts are spinning in and out of my empty head So is this our new world with too many people set to explode? Well that's what I've heard

Here I am trying so hard to express myself My eyes are wide open but my mouth is shut So please...let me believe that you're my desire

If you can, come with me The beast cures the lover Come with me, close your eyes The beast cures the lover

Here I am trying hard to be understood Some say "surrender", but I've already lost So please...let me believe that you're my desire You're my desire

If you can, come with me The beast cures the lover Come with me, close your eyes The beast cures the lover Come with me, close your eyes The beast cures the lover
