The Watchmen

One or two more times inside my head and what's it stand for
Racing time the temporary far away from your door
Once in a while I find I run one more mile
Though I know you're not my idea
Feel I'm kind of stuck with you
What's behind the lines
Caught in the center of your hollow entertainer
And I wonder whatever do I see in you
Yeah but I see it in you
Autumn breaks your boyfriend wakes leaves fast with your daughter
They send you time and time again pictures of them
And tell me about the royalty in Iceland
You waltzed right in the center and just sat
You threw our lives upon our ears like that
I can't believe you died
Caught in the center of your hollow entertainer
And I wonder whatever do I see in you
Yeah but I see it in you
Scene it turns the candle burns bed-ridden 'cause you have to
Sleeping all your days away 'cause waking hours scare you
How about a smile be the last thing that I give you
Hands off the trigger 'cause I'm a hollow entertainer
Also I wonder whatever do I see in you
And did you see it in me
