

# Life of the Party

The Weeknd

Welcome to the other side  
You're lost  
Baby, step outside your mind  
You've been really gone  
You've been really gone  
You've been thinking 'bout being bad  
Ever since I put you on  
She got money for blow  
Just check her damn nose

Prescription ain't an issue  
You can mix it with the uh  
And if you wanna do it, baby  
I'm right here with you  
I'm on cloud 9  
Baby, you're behind  
You can follow me  
You can follow me if you want

Go downtown with the drugs in your body  
Take that step you're the life of the party  
Know that step you're the life of the party

I got two little ladies  
I got one little room  
There's a room full of niggas  
Baby, what you wanna do?  
The way you move got me feeling so uhh  
I been thinking about it, baby  
I been thinking about it lately

I'm so far gone and you are too  
Show me how you...

Go downtown with the drugs in your body  
Take that step, you're the life of the party  
Know that step, you're the life of the party

I love how you touch  
How you feel  
How you breathe  
Baby, how you do it so good

How you twist with your lips got the room so small, baby  
Girl please don't go  
You're gonna please my boys  
You been thinking about it, baby

Yeah you're a star  
Oh you knocked one down  
Girl, you knocked it down  
Girl, there's 1, 2, 3

Go downtown with the drugs in your body  
Take that step you're the life of the party  
Know that step you're the life of the party
