

# The Town

The Weeknd

You did many things that I liked, that I liked  
And you like diamond rings  
I can provide, I can provide for you  
You made me feel so good  
Before I left on the road  
And you deserve your name on a crown, on a throne  
(2x)

I haven't been around the town in a long while  
I apologize but I  
I've been trying to get this money like I got a couple kids who rely on me  
I remember on the bathroom floor  
Before I went on tour  
When you said we couldn't do it again  
Cause you had a thing with some other man  
You said it was love  
And you said you were lost  
Then you wished me good luck  
To find somebody to love  
But, ooh  
Now I've heard that you're single  
And oh, I'll give you something to live for  
Yes, I would

Honey please  
You never thought you'd ever see my face again  
But your love just swayed the lies  
When he stared into your eyes  
He just might be too good for you  
You're almost dead to him  
You're sleeping with a frozen heart  
Well baby girl it's over now  
And you can always count on me  
Your unshackled boy, unrestrained touch  
So immune to love  
And it feels so priceless to me  
That you're always free  
That you'll take me in  
Now, I'm everything, your everything  
I bet you'll take me in  
I know you'll take me in now  
The same place I left you in  
I bet you'll take me in  
I know you'll take me in, I know you'll take me in  
The same place I left you in

You did many things that I liked, that I liked  
And you like diamond rings  
I can provide, I can provide for you  
You made me feel so good  
Before I left on the road  
And you deserve your name on a crown, on a throne
