

People Say

The Wolfgang Press

People say, "It's easy living in the light"
Never see the hard times, never see the fight
Simple when it's slow but only if it's right
I only see the good times every time

And now I've seen the whole, I'm ready to believe
And now I've seen the proof, I'm ready to concede
The same amount of hope is here upon my back
People say they know

People say they think but they don't
And then they say they will but they won't
People say they think but they don't
And that's all mine

Stepping into black and living in the light
Living isn't easy but life it does divide
Thinking of having babies won't seem right
You're going to have a hard time every time

And we're holding up the seeds like we're holding up the flame
And fearing that the women won't breed another name
Never tear apart what you're reaching to achieve
People say they know

People say they think but they don't
And then they say they will but they won't
And people say they think but they don't
That's all mine

Staring into black whilst living in the light
Living isn't easy but life it does divide
Charlie Manson said that everything is right
And Charlie Manson knows

That people say they think but they don't
And then they say they will but they won't
People say they think but they don't
And that's all mine

People say they think but they don't
And then they say they will but they won't
People say they think but they don't
And that's all mine
