

# That's What Angels Can Do

The Wood Brothers

You pushed my buttons  
Started me knowin' things I already knew  
How did you understand  
With the palm of your hand

I guess that's what angels can do  
Angels can do

You held my burden  
Rested my bones in your arms sweet and true  
How did you stay so strong  
And kiss me so long

I guess that's what angels can do  
I guess that's what angels can do  
Angels can do  
That's what angels can do

You pulled my trigger  
The song that rang out was so pretty and new  
How did you get so wise  
With one look in my eyes

I guess that's what angels can do  
I guess that's what angels can do  
I guess that's what angels can do  
Angels can do  
That's what angels can do
