

# Darkness

## The Working Title

With the rain coming down i am dreamin  
all over the world europeans  
have started to train californians  
to mimic the plight of menelaus and dear god its laughable  
when I awake thinking all the cars have been taken back by them  
and the californians have waged war on them

Now I'm thinking how all of the georgians  
have conspired against my best interest  
and feeling deprived

I sit alone as the darkness covers over the room  
replacing the light malignant  
wondering how long i can survive alone

I'll make them believe i am stronger  
and flexing my fleets i will win her  
back from the world before winter  
baby bring your disease i am stronger  
I'll make you clean

Still i sit alone as the darkness covers over the room  
replacing the light malignant  
wondering how long i can survive alone  
well its not much longer i will be out like a light before dinner  
oh no one gets to say what they mean well i need you

And if you are a dear and running...then i'm out there to catch  
you and make you feel at home
