

## Together

The xx

I know to be there  
When and where, I'll be there  
You know what's to be said  
We said out loud, we never said  
My premonition of the world comes to me  
A sun in your hands from the middle life  
Says I'm alright

You said you don't have to speak  
I can hear you  
I can't feel all the things you've ever felt before  
I said it's been a long time  
Since someone looked at me that way  
It's like you knew me  
And all the things I couldn't say

Together, to be  
Together and be  
Together, to be  
Together and be  
Together, to be  
Together and be  
Together, to be  
Together and be

Together, to be  
Together and be  
Together, to be  
Together and be  
Together, to be  
Together and be  
Together, to be  
Together and be
