

# Ultraviolet

Theophilus London

My life is crumbling  
My world is falling down  
You see me stumbling  
I feel it all around

I'm Ultraviolet, but they say that I'm blue  
I'm Ultraviolet, but they say that I'm cool

Gimme gimme gimme some more  
Gimme gimme gimme some more

I'm Ultraviolet, you Ultraviolet too

No, you don't have to go, tonight you must stay  
No, you don't have to go, tonight you must stay  
No, you don't have to go, tonight you must stay  
No, you don't have to go, tonight you must stay

They say that life will never end  
I hear it time and time again

No, you don't have to go, tonight you must stay

It's my nightmare, my nightmare, my nightmare  
This is my nightmare, my nightmare, my nightmare  
Can you feel it? Can you feel it?  
This is what you do to me

It's cold, but I'm warm  
Standing in the shadows, they resent my face  
I'm alone, it feels good  
Away from everyone, just when I should

I can't feel my face, what's happened to me  
Thoughts don't get slow, more rapid for me  
There's a whole world lonely, clapping for me  
You are me so, just tap into me  
I can't feel my face, what's happened to me  
Dark soul, misnomer rapping for me  
There's a whole world lonely, clapping for me  
You are me so, just tap into me

A riot, can you feel it?
