

# The One

## Theory Of A Deadman

When you come around I don't really know what to say  
My mind is racing with thoughts that I can't erase  
Like if we've had a house to call our own  
If we had a little girl would she have your nose  
This voice inside won't leave me alone

Cause I wonder if we could've made it last  
I wonder if we gave it all we had  
Or if our tempers got the best of us  
I wonder if I could've been a better man  
Maybe you'd be with me 'til the end  
Cause even though we're set and done  
I still wonder if you could've been the one  
One, one, one

When you come around you always ask if I'm okay  
I tell you that I'm fine yeah just like a guy would say  
I know you know somethings wrong  
Cause you know me better than anyone  
The truth is I never felt more alone

Cause I wonder if we could've made it last  
I wonder if we gave it all we had  
Or if our tempers got the best of us  
I wonder if I could've been a better man  
Maybe you'd be with me 'til the end  
Cause even though we're set and done  
I still wonder if you could've been the one  
One, one, one

When you come around I really don't know what to say  
I just really fucking miss you and that will never change

Cause I wonder if we could've made it last  
I wonder if we gave it all we had  
Or if our tempers got the best of us  
I wonder if I could've been a better man  
Maybe you'd be with me 'til the end  
Cause even though we're set and done  
I still wonder if you could've been the one  
One, one  
Could've been the one, you were the one, one  
I still wonder if you could've been the one
