```
You knew this wouldn't last forever
You never thought you'd live to see it taken away
Another super-human chemical hero
A pocket full of change when it comes to pay
```

```
This is the last blast, baby
This is the last blast, baby
This is the last blast
```

There go the shakes and staggers You lose a nerve on this crumbling ladder Can't feel your feet and your lungs are aching Your self control's at the point of breaking

```
This is the last blast, baby
This is the last blast, baby
This is the last blast, baby
This is the last blast
```

You knew this wouldn't last forever You never thought you'd live to see it taken away Another super-human chemicals hero A pocket full of change when it comes to pay

```
This is the last blast, baby
This is the last blast, baby
This is the last blast, baby
This is the last blast
```
