

Small World

There for Tomorrow

Do you miss it
Like you said you would
The mutual understanding
Did I meet any of those demands you
made so out of this world
Should I listen when the winds blows ?
Cause it's blowing in a new direction
I can't help but feel like I'm affected
Get me out of this small world

So let me go ... let me go
Somewhere where no one's ever been before
Light a fire ...a burning fire
Let it get out of control. Let me go
Somewhere where everybody breaks the mold
Paint a picture
That's bigger than your small, your small
Your small sad world
Your small sad world

Do you feel it
Like I thought you would
I found you right where I left this
Never imagined your sideways preference
would get so out of this world
Do you see me through the looking glass
Smiling at my reflection
Came up short with your thin affection
Get me out of your small, sad world...

So let me go ... let me go
Somewhere where no one's ever been before
Light a fire ... a burning fire
Let it get out of control. Let me go
Somewhere where everybody breaks the mold
Paint a picture
That's bigger than your small, your small
Your small, sad world
Your small sad world
Yeah

Minutes ...minutes
Minutes ...minutes
Have been changing my mind
Seconds ...seconds
Seconds ...seconds
I could do without your precious time

Should I listen when the wind blows?
Cause it's blowing in a new direction
Yeah it's blowing in a new direction
And I'm going...
Yeah

So let me go ...let me go
Somewhere where no one's ever been before
Light a fire ... burning fire

And let it get out of control
Out of control, out of control
Somewhere where everybody breaks the mold
Light a fire
In your small, your small
Your small, sad world

So long, Goodbye
