## **Apartment Four**

## **They Might Be Giants**

I live up in apartment four I'm on the very next floor The number's right on the door

If you ever get bored Come knock on my door The one with the four

I live up in apartment number four Where the sound of the drum comes from Just follow the sound That's where the four is found

You don't know me But I remember when you Moved into flat number two That was the day that I knew

That I was not the only one Who might like the drum That was shaking the floor Of apartment four

Come on up to apartment number four Where the noise of the drum comes from Just follow the sound That's where the four is found
