

## Lover Lover

Thieves Like Us

When I was a child I saw illusions a lot  
Take a trip with my mirror and a dream comes to thought  
Cross the ocean to infinity

How we're made pure in the house where we met  
All the time that fell away has been put back in place  
And the seconds they come beautifully

Lover lover lover lover  
Generate a new harmony

Rain is falling down in the streets near our house  
We are joined and turned to dust in the fond radiance  
And as one we're singing endlessly

Lover lover lover lover  
Stand by me and we'll be stronger  
Lover lover lover lover  
Dance with my I'll recover

Lover lover lover lover

Rain is falling down in the streets near our house  
Take a trip with my mirror and a dream comes to thought  
And as one we're singing endlessly

When i was a child i saw illusions a lot  
Laid to rest at Solaris and a dream comes to thought  
And together we sing endlessly

Lover lover lover lover  
Stand by me and we'll be stronger  
Lover lover lover lover  
Dance with me and I'll recover  
Lover lover lover lover  
Generate a new harmony
