Remember those golden days We used to walk hand in hand I was your friend, your fool, your lover I was your man I can see you then Smiling, looking straight at me You caught me unawares, I blushed Let's sit beneath this tree I can't get over the change in you I can't get over the change in me And I keep on remembering the old days I keep on remembering the old ways I can recall you running to a sweet shop You stopped Bought me something And you handed it to me You were my girlfriend then The first that I ever had The first that I ever kissed And the first to make me sad I can't get over the change in you I can't get over the change in me I keep on remembering the old days I keep on remembering the old ways Oh yeah I keep on remembering I keep on remembering Oh yeah I keep on remembering the old days I keep on remembering Your pretty dress With the zip up the back I used to love you like that I used to love you like that Oh yeah I keep on remembering

I keep on remembering all about you
