

# Darkness

Third Eye Blind

Blue come over  
Born a joneser  
The cops pull out the radar  
And shoot devious grins  
Another day begins  
I want someone to know me  
Maybe tell who I am  
Cause I've faced down my demons  
And cried out to a God  
A God I've never seen  
Lights

And the world darkens around me  
Strange friends all surround me  
New ideas in my head start to burn  
Dropped out of schools cause of things I never learned  
Cause the world darkens around me  
World darkens around me

I want you to love me  
(Like you did)  
Before you knew me  
And I never thought there'd be any help  
For somebody like me  
A vacancy  
Say!

Cause the world darkens around me  
Strange friends all surround me  
New ideas in my head start to burn  
Trust no one that's the one thing that I learned  
Cause the world darkens around me  
World darkens around me

Bring me the sun cause I slide off the moon  
Bring me the sun  
Slide off the moon  
Yeah you better get home soon  
There's no hope for people like you and me  
There's no hope for people  
Slide off the moon  
Bring me the sun cause I slide off the moon  
Bring me the sun  
Slide off the moon
