Last Forever

Thirteen Senses

Sunrise is over Your walking on by And i'm nowhere Two lives driven by quakes Your walking a life So i'm no-one

Angel see the signs Don't worry leaving me behind

Animals they walk, out of their hiding place Cause their no-one Temper carries over Your numbers have dropped So your no-one

Angel see the signs Don't worry leaving me behind And our cruddy lives Our best when shaped into a neck

And all we gotta know We were the first that last forever
