

Love In The Way

This Century

She walks in the room thats where it starts
I really need you ? straight to the heart
She likes to mix it up fast slow fast slow and down
Girls whisper hah I wonder if she gets around

I don't think they understand
You know you got it got it figured out
Cause confidence means everything
Push it on the side
And you don't have to you don't have to fake it
Something turns to nothing
When your love gets in the way

She tried to keep it chill
So I just kept my distance
But when she went outside
She asked for some assistance
But as she turned away
I turned in other ways
To say that it bothered me
Would be a understatement

I don't think they understand
She thinks shes got it got it figured out
Cause confidence means everything
Push it on the side
And you don't have to you don't have to fake it
Something turns to nothing
When your love gets in the way

Loving the way loving the way
She cant contain herself

Oh oh oh oh she thinks shes got it figured out
Cause confidence means everything
Push it on the side
And you don't have to you don't ever have to fake it
Something turns to nothing
When your love gets in the way
