

# Close Your Eyes To Heaven

Thomas Anders

Now and then I lie awake  
Watch you as you sleep  
The morning light around your face  
The rhythm as you breathe  
Once forever held me down  
Today forever's here  
Heaven somewhere far beyond  
Beyond is now so near  
All at once I'm running  
I'm out of breath in love  
It's been a long time coming  
Our love is moving up

Close your eyes to Heaven  
Hold on to your dreams  
Close your eyes to Heaven  
There's more than we can see  
A love that we can build remains  
A fortress strong indeed  
A love like ours won't fly away  
Though our hearts have wings  
We have to close our eyes to be sure

Sometimes love just tumbles out  
And leaves us flying blind  
Now we've learned to work it out  
'Cause we have time for time  
All at once we're running  
We're out of breath in love  
It's been a long time coming  
Our love is moving up
