

# One Thing

Thomas Anders

My hands at the wheel, my eyes on the city of fame  
My heart is excited, I'm back where the sun got its  
name  
A star on the billboard, I swear, looks me right in the  
eye  
It's talkin' to me now, I'm sure, as I pass it by

I wanna be in America  
Where the desert meets the skies  
I wanna buy up America  
With its love and oceans, love and oceans

One thing - I always wanted something new  
One thing - I turned around and I found you  
Love can be so exciting  
One thing - I always wanted something new  
One thing - I turned around and I found you

A house on the hill and a car full of plastic and  
chrome  
The radio's blastin', I feel like I've finally come  
home  
I drive through the canyon aware of the air that I  
breathe  
It's hot here in heaven but hell - it don't matter to  
me

I wanna stay in America  
Where the desert meets the skies  
I wanna buy up America  
With its love and oceans, love and oceans

One thing - I always wanted something new  
One thing - I turned around and I found you  
Love can be so exciting  
One thing - I always wanted something new  
One thing - I turned around and I found you

Only I wanna  
Only wanna be with  
Only I wanna  
Only wanna be with you  
I wanna be with you

One thing - I always wanted something new  
One thing - I turned around and I found you  
Love can be so exciting  
One thing - I always wanted something new  
One thing - I turned around and I found you
