

The Love In Me

Thomas Anders

Bring out the love in me
Bring out the love in me
I'm what I want to be
Any time you're with me
I know the meaning of love
Our combination is sweet inspiration
And baby I can't get enough
You came along and you rescued me
You exceeded all my expectations
I've gotta have you exclusively
I'll never want another

You bring out the love in me
I wanna thank you baby
Love, love, love
The things you do
Bring out the love in me
I feel the inspiration
In me and I'm lovin' you

You do something new to me
Changin' my destiny
I know, know, where I belong
Here in your arms
It feels so right
It just can't be wrong
'Cause you came along and you rescued me
You exceeded all my expectations
I've gotta have you exclusively
I'll never want another

What a lover you found in me
Never knew what I could be
What a lover you found in me
Baby gonna give you what you need
What a lover you found in me
Never knew what love could bring
What a lover you found in me
Baby wanna show you all my dreams

You came along and you rescued me
You exceeded all my expectations
I've gotta have you exclusively
I'll never want another
