

Tonight Is The Night

Thomas Anders

Tonight is the night
(Take a chance to make our dreams come true, mmmm)
Tonight is the night, Tonight!

Don't know where you are, I know you're my star
I feel it in the air, you're my fantasy, yet so real for me
It's time for a love affair, I know what I feel
It's more than a miracle, so beautiful, it's the right place
And the right time, I know you'll be mine

Tonight is the night, I feel it inside
I know we can take the chance
To make our dreams come true
I know it is you and I wanna hold you tight
Tonight is the night, you know it's alright
Will you stay with me until the morning light
Time's on our side, cause tonight will be the night

We can touch the sky, together, you and I
Come see, we're losing ground
You're my destiny, and in your eyes I see
That love is all around, did you know
That life could be so wonderful
So magical, I wanna make you stay
I wanna hear you say: Let's dance the night away

Tonight is the night, I feel it inside
I know we can take the chance
To make our dreams come true
I know it is you and I wanna hold you tight
Tonight is the night, you know it's alright
Will you stay with me until the morning light
Time's on our side, cause tonight will be the night

Did you know that life could be so wonderful
So magical, It's the right place in the right time
I know you will be mine, Yeah, yeah

Tonight is the night, I feel it inside
I know we can take the chance
To make our dreams come true
I know it is you and I wanna hold you tight
Tonight is the night, you know it's alright
Will you stay with me until the morning light
Time's on our side, cause tonight will be the night
