

True Love

Thomas Anders

Velvet and rain surrounded all my dreams
Till your touch
Changed my blues to emerald greens
I know like fire in a storm
That's real

There's a place I'm holding in my heart
For this true love
That's burning worlds apart
There's a place my heart is dreaming of
Of a true love, true love
Of a true love, true love

Bring out in me
The feelings I hide
Let me be your sun, your moon, your very pride
I know like fire in a storm
That's real
