

Turn Around

Thomas Anders

Sometimes we lose our way
And the world that we knew has gone
Isn't it strange how life can change
Nothing is real for long
So many things unsaid
And my logic left so confused
Am I naive when I believe
I'm still a part of you

Turn around, turn around
Step out of the night
Walk into the light
Let me know, let it show
That your love is real
And I'll be right by your side

Don't tell me you don't know
I can't carry these doubts for two
Fashioned by fate, why does love wait
To make the final move
How can I give you more, more
Without tearing myself apart
I'm just a man with simple plans
Suffering for my heart

Turn around, turn around
Step out of the night
Walk into the light
Let me know, let it show
That your love is real
And I'll be right by your side
