

World Of Stars

Thomas Anders

You were a lady in red when we first met
I thought to myself this is as good as it gets
When Harry met Sally there were fireworks
But nothing like the moment that we kissed
Just like the movie 'Love Affair'
At first your feelings just weren't there
But then like a bed of roses I swept you off your feet
And now we're meant to be

You send me into orbit when you touch my face
Far beyond the moon and the Milky Way
There's never been a love as strong as ours
Not even in the world of stars

Like "Casablanca" when we parted ways
I was sleepless in Seattle with some lonely days
And just like "Pretty Woman" when I saw you again
But we're more than just a movie
We're more than just a dream

You send me into orbit when you touch my face
Far beyond the moon and the Milky Way
There's never been a love as strong as ours
Not even in the world of stars

Just like Romeo & Juliet
My love will never be gone on the window
Far, and away...

You send me into orbit when you touch my face
Far beyond the moon and the Milky Way
There's never been a love as strong as ours
Not even in the world of stars

You send me into orbit when you touch my face
Far beyond the moon and the Milky Way
There's never been a love as strong as ours
Not even in the world of stars
