

Like a Machine

Thousand Foot Krutch

Got a red eye on...
Got a red eye on...
I've got a red eye on
Gonna bring it on like a war machine

When it hits your like a wave
You're not gonna feel the pain
So stand and face the ray like a war machine

You gonna give me your heeey...
You gonna give me your HEEEEY
You wanna play this game
You can face the pain like a war machine...

Coming through life...
We're coming though life... hey
Coming through life... like a war machine

Coming like a machine...
Chasing the hatching door
Cause we ain't gonna run no more

Like a machine...
This time I won't let go
Either step up or hit the floor

Coming like a machine...
And we might rock the party
But we ain't gonna hurt nobody

Like a machine...
Step up and hear no more
Look up and see the marching saw

You could see it rise
But you never hear it fall
But you could see it's eyes
Where it stars to rise like a war machine

When it a hits your like awaits
You not gonna feel the pain
So standing face the way like a war machine

You gonna give me your heeey...
You gonna give me your HEEEEY
You wanna play this game
You can face the pain like a war machine...

Coming through that...
We're coming though that... hey
Coming through that... like a war machine

Coming like a machine...
Chasing the hatching door
Cause we ain't gonna run no more

Like a machine...

This time I won't let go
Either step up or hit the floor

Coming like a machine...
And we might rock the party
But we ain't gonna hurt nobody

Like a machine...
Step up and hear no more
Look up and see the marching saw

This slumber that I'm in
Can't find the feeling that I've been...
I've been... feeling...

Because now the time is gone
So work the line and come undone
I will... Oh I will...

And I am not afraid
Of the power you contain
And I am not ashamed
Cause the choose defeats the pain

Coming like a machine...
Chasing the hatching door
Cause we ain't gonna run no more

Like a machine...
This time I won't let go
Either step up or hit the floor

Coming like a machine...
And we might rock the party
But we ain't gonna hurt nobody

Like a machine...
Step up and hear no more
Look up and see the marching saw
