

Look Away

Thousand Foot Krutch

She's everything to everyone wish
I could have seen it come
Down but I heard it correctly
It seems everything she knows is now
Five minutes to close and thats
Not a lot of time when you're nervous

And they say don't look away
Don't be afraid when you want to turn back a million times
It might get colder but wait til it's over
Darling you'll find your way

And she said I will not look away this time,
Take all these cuts and make them shine
And all this pain I feel inside,
So I can find my way home again

I will not look away this time,
Take all these cuts and make them shine,
Don't wanna be perfect just alright

He's on his way to nowhere
Cause he heard it was safe there
And safe is something valuable here
He spent half his life searching and
The other half working to find out if Jesus is real

And they said son look away
Don't be afraid when you want to turn back a million time and it might get c
older but wait til it's over
Son you will find your way

And I said I will not look away this time
Take all these cuts and make them shine,
And all this pain I feel inside
So I can find my way home again

I will not look away this time
Take all these cuts and make them shine
Don't want to be perfect just alright

And every time every line
Every time you want to say goodbye,
Every time every line
Every time you want to say goodbye sing

I will not look away this time
Take all these cuts and make them shine,
And all this pain I feel inside
So I can find my way home again

I will not look away this time
Take all these cuts and make them shine
Don't wanna be perfect just alright

She's everything to everyone wish
I could have seen it come

Down but I heard it correctly,
it seems everything she knows is now
Five minutes to close and that's not a lot of time when you're nervous
