

Set Me on Fire

Thousand Foot Krutch

Feel like I'm staring at the sun but I feel no pain
Got a feeling in my heart that I can't explain
This walls I've build they all fall down to you

Head it's a rush like a river that bounce through me
I get caught in your type like I can't believe
You hold me like an open fire in you

And my heart beats love like a thousand drums
Feeling love like the city where I come from
I've got a hold in my heart that I can't explain for you

And you set me on fire... you set me on fire
You set me on fire... you set me on fire
You set me on fire... you set me on fire
And you set me on fire... you set me on fire

I've been everywhere on earth and I still can't find
I'm feeling like I passed to your blinding light
These doors I've locked they all opens for you

Head it's a rushes like a river that bounce through me
I get caught in your type like I can't believe
You hold me like an open fire in you

And my voice sings love like a thousand drums
Feeling love like the city where I come from
I've got a hold in my heart that I can't explain for you

And you set me on fire... you set me on fire
And you set me on fire... you set me on fire
You set me on fire... you set me on fire
And you set me on fire... you set me on fire

Burn me with your love so bright
Burn me like an open fire
Burn me with your love so bright
So I can feel you... I can feel you...

Burn me with your love so bright
Burn me like an open fire
Burn me with your love so bright
So I can feel you... I can feel you...
