

The Safest Place

Thousand Foot Krutch

I'm convinced I've seen, an escape for everything
They might have different names
But they're all the same but the secrets safe inside,
Alone, and dark it hides, and iI'd ignore it
But it won't go away

And all I feel is static, this beat is automatic
I've tried to kick this habit but every time I grab it

And I won't be the safest place to hide
Take this cup from me, your sick and twisted lies
And I won't be your safest place to hide, lord
Help me break these chains, I need to see the light

And now i see the way, you've constructed me
Taking all that was and throwing it away
Now I know it's just the flame in all of us
And I can burn this up or blow it away

And all i feel is static, this beat is automatic
I've tried to kick this habit but every time I grab it.

And I won't be the safest place to hide
Take this cup from me, your sick and twisted lies
And I won't be your safest place to hide, lord
Help me break these chains, I need to see the light

And all I feel is friction, I don't want it, I hate this addict
ion
And all I feel is friction, I don't want it, I hate this addict
ion
And all I feel is friction, I don't want it, I hate this addict
ion
And all I feel is friction, I don't want it, I hate this addict
ion
And all I feel is friction, I don't want it, I hate this addict
ion
And all I feel is friction, I don't want it, I hate this addict
ion!

And I won't be the safest place to hide
Take this cup from me, your sick and twisted lies
And I won't be your safest place to hide, lord
Help me break these chains, I need to see the light

And I won't be the safest place to hide
Take this cup from me, your sick and twisted lies
And I won't be your safest place to hide, lord

Help me break these chains, I need to see the light
