

# Terminal Madness

## Threat Signal

Can you even hear me?  
Comprehend all the words I speak  
Blind repressed and controlled I've been disposed  
Wake from the dead, awake from the coma inside  
Reprise, take back the me inside  
Never forget, never repress

And now that I'm standing on the edge  
No one can save me from the end

This lunacy, misled into the machine  
Fake, forced to be obsolete

Will I ever break free? Disconnect from insanity  
Rise to fight the infection that takes hold  
Break from this cage, break from the nightmare inside  
Decide take back the life inside

Illusion, false paradigm of reality  
Illusion, false paradigm of reality  
Distortion of the mind

And now that I'm standing on the edge  
No one can save me from the end  
Without your trust I know you'll never see  
And nothing can change me now, I'm free

Nothing can change me now  
I've fallen away from the world  
Awaken the mind  
Welcome to the spiritual war

Mind control, terminal madness of the physical world

Find the answer to this lie  
Question all you've ever known

And now that I'm standing on the edge  
No one can save me from the end  
Without all your trust I know you'll never be  
And nothing can change me now, I'm free

What I thought was reality is slowly slipping away  
Everything I've expected as normal, it disintegrates

Lie through your teeth, destiny comes to those who seek  
Love will solve everything  
Forget the world we know  
Dismiss the hate that grows  
I will find my peace
