

# Hollow

## Threshold

Never found me a reason why  
All I saw was a hollow sky  
Did I set my sights too high  
To find a path before me.  
I dreamed of shooting stars  
I travelled out so far,  
Tried to signal where you are  
But nothing could assure me

Inside, outside, any side  
Still I'm looking for alibis  
Cast aside, close my eyes now I'm here

Chorus:

And the words seem hollow now  
But I don't want to let you down  
Cause the world just came around  
And everything is brighter.  
I was so unsure  
'til I found the door  
And you let me in.

When the flags have blown away  
And the footprints started to fade  
Will I find my way again  
Or lose the path before me,  
I saw the leaves go brown,  
I saw them falling down  
All my dreams lying on the ground  
With nothing to assure me

Fall came, hard rain, clean again  
Still I'm waiting and mesmerised  
Purified, close my eyes, now I'm here

Chorus:

And the words seem hollow now  
But I don't want to let you down  
Cause the world just came around  
And everything is brighter.  
I was so unsure  
'til I found the door  
And you let me in.

(Solo)

Fall came, hard rain, clean again  
Still I'm waiting and mesmerised  
Purified, close my eyes, now I'm here

Chorus
