

## Music Box

Thrice

we move for all mankind, a million miles from everything we've  
ever known  
and we're on their hearts and minds, a million heads are bowed  
to bring us safely home  
hemmed in by emptiness, a million ways that everything could be  
undone  
this hollow in my chest is filled with reasons not to sing but  
I found one, I know

we are not alone, we feel an unseen love  
we are sons and heirs of grace  
we are children of a light that never dims  
a love that never dies, keep your chin up child  
and wipe the tears from your eyes

in sleep we saw ourselves, a million years we had been waiting  
there it seems  
while someone weaves a spell, a million stars look on in witness  
to our dreams, I know

we are not alone, we feel an unseen love  
we are sons and heirs of grace  
we are children of a light that never dims  
a love that never dies, keep your chin up child  
and wipe the tears from your eyes

we feel an unseen love  
we are children of light

we are not alone, we feel an unseen love  
we are sons and heirs of grace  
we are children of a light that never dims  
a love that never dies, keep your chin up child  
and wipe the tears from your eyes

stand ready and tall, reflect the light
