

# Burn Me Now

Thriving Ivory

I follow you  
Will I ever learn  
Your words are lies on a page  
We've never had the chance to turn  
I've been here before  
It ain't hard to see  
Your sky is crumbling down  
But you can't blame gravity

When I move, you move  
And so we run in place  
We're chasing tails  
Running circles in this empty space  
With no light we fight to keep this love ablaze  
So let me be the one to put you out

So if you're gonna start a fire  
You better burn me now  
Tell me who's gonna touch your flame  
When the doors are closed and the air runs out

So if you're gonna make your move  
Come on show me how  
Tell me who's gonna touch your flame  
When there's no one left  
Better burn me now

Are you all alone  
Laying in the dark  
Wishing someone would come along  
And start your frozen heart  
I'm still waiting here  
It ain't hard to see  
You're just hanging around  
Barely out of reach

When I move, you move  
And so we run in place  
We're chasing tails  
Running circles in this empty space

So if you're gonna start a fire  
You better burn me now  
Tell me who's gonna touch your flame  
When the doors are closed and the air runs out

So if you're gonna make your move  
C'mon show me how  
Tell me who's gonna touch your flame  
When there's no one left  
Better burn me now  
Better burn me now  
You better burn me now  
Better burn me now

When I move, you move  
And so we run in place

We're chasing tails  
Running circles in this empty space  
With no light we fight to keep this love ablaze  
So let me be the one to put you out

So if you're gonna start a fire  
You better burn me now  
Tell me who's gonna touch your flame  
When the doors are closed and the air runs out

So if you're gonna make your move  
C'mon show me how  
Tell me who's gonna touch your flame  
When there's no one left  
You better burn me now  
You better burn me now

So let me be the one to put you out  
So let me be the one to put you out

If you're gonna start a fire  
You better burn me now
