

# Where We Belong

Thriving Ivory

We're too far out we're in too deep  
And we've got miles to go before we can sleep  
I said, we've been walking a thin line  
You've got one hand on the devil baby and one hand in mine  
But don't let go no it's not too late you know

Hold on we're gonna make it if it takes all night  
Hearts racing like a rocket at the speed of light  
Don't fight it we've been running for far too long  
We're going back where we belong  
So hold on we got our wings and we're chasing the wind  
Farewell to all the places that we have been  
And if it takes us all night long  
We're going back where we belong

So we'll build temples in our heads  
When we've grown frail and all our bones are of lead  
We've been walking a winding road  
Let's go, no footsteps to follow baby and no signs to guide us home  
Don't let go, no it's not too late you know

Hold on we're gonna make it if it takes all night  
Hearts racing like a rocket at the speed of light  
Don't fight it we've been running for far too long  
We're going back to where we belong  
So hold on we got our wings and we're chasing the wind  
Farewell to all the places that we have been  
And if it takes us all night long  
We're going back where we belong

See I have to believe that there's more than this seems  
More than a soul in a boat in a sea of sinking dreams  
And I have to be sure that there's gonna be a cure  
'cause somewhere down the line, I lost that part of me that's pure.

But don't you let go yet no it's not too late you know  
Hold on we're gonna make it if takes all night  
Hearts racing like a rocket at the speed of light  
Don't fight it we've been running for far too long  
We're going back to where we belong  
Hold on we got our wings and we're chasing the wind  
Farewell to all the places that we have been  
And if it takes us all night long  
We're going back where we belong

Hold on we're gonna make it if it takes all night  
Hearts racing like a rocket at the speed of light  
And if it takes us all night long  
We're going back where we belong  
We're going back where we belong
