

# While The Candle Still Burns

Thriving Ivory

I can hear your car  
as you leave driving in circles.  
Reluctant to park  
until you're ready and stable.

So walk with me into the fire. C'mon follow me  
Close behind and we'll go where they won't know  
Our secrets and sorrows.  
We should leave while we can and be gone by tomorrow  
Can't you see how the second hand turns  
We should go while the candle still burns.

You hesitate to start  
you just stand there with your hands bare  
and wonder who you are  
and you take too much to heart  
so you build another thrill  
'til this one falls apart

So walk with me into the fire. C'mon follow me  
Close behind and we'll go where they won't know  
Our secrets and sorrows.  
We should leave while we can and be gone by tomorrow  
Can't you see how the second hand turns  
We should go while the candle still burns.

Have you ever  
let another put out your flame  
and have you ever said I'm a fool to stay in the same place  
So we'll go where they won't know  
Our secrets and sorrows  
We should leave while we can and be gone by tomorrow  
Can't you see how the second hand turns  
and we'll go where they won't know our secrets and sorrows  
we should leave while we can and be gone by tomorrow  
Can't you see how the second hand turns

We should go while the candle still burns  
We should go while the candle still burns
